

## JIRA API TOKEN:

Integrate the Jira with this existing codebase:

Opened Powershell from Root Dir:

```
cd "F:\TestLeaf Training\Documents\GenAI_Assignments\phase-1\Week-3\Sunday\user-story-to-tests-updated-ui"
```

Install all root and workspace dependencies: (Start both frontend and backend:)

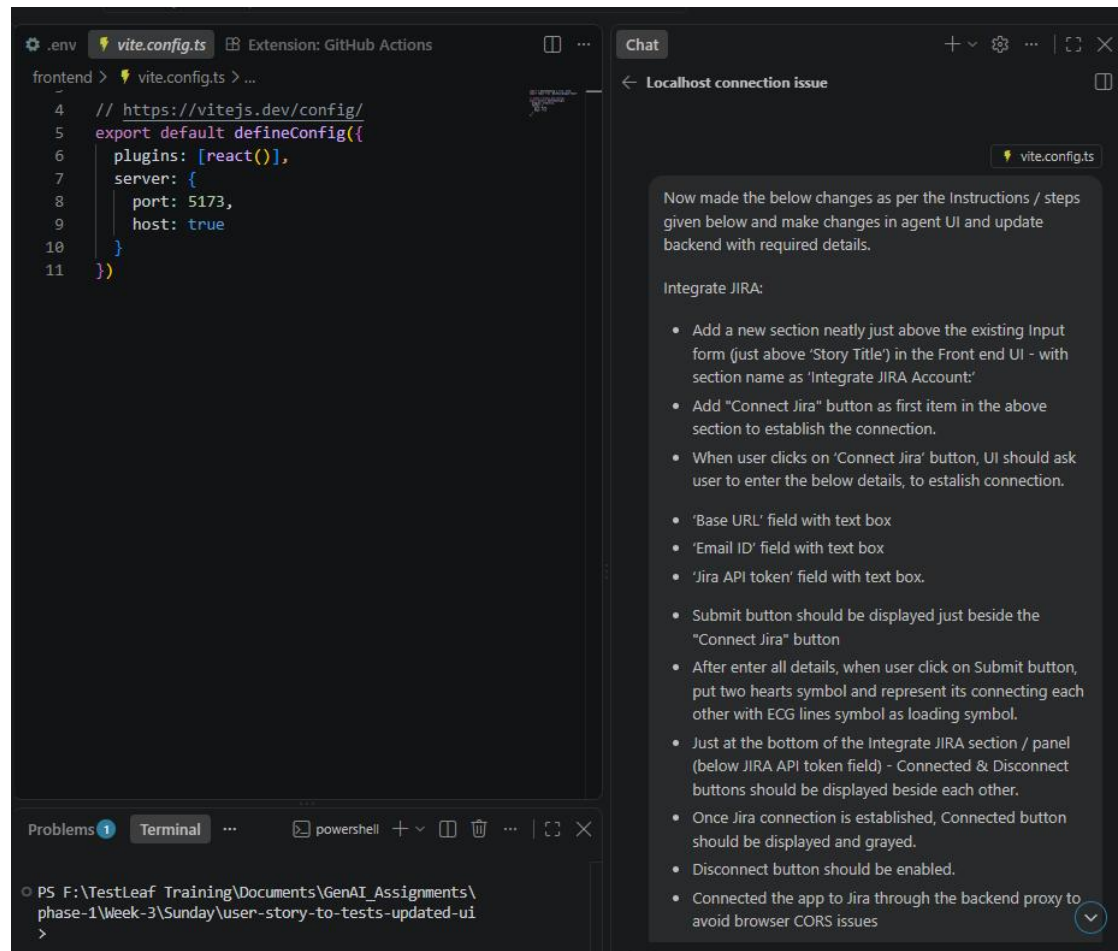

```
npm install
npm run dev
```

Below components are implemented as part of Jira Integration and Day 2 changes:

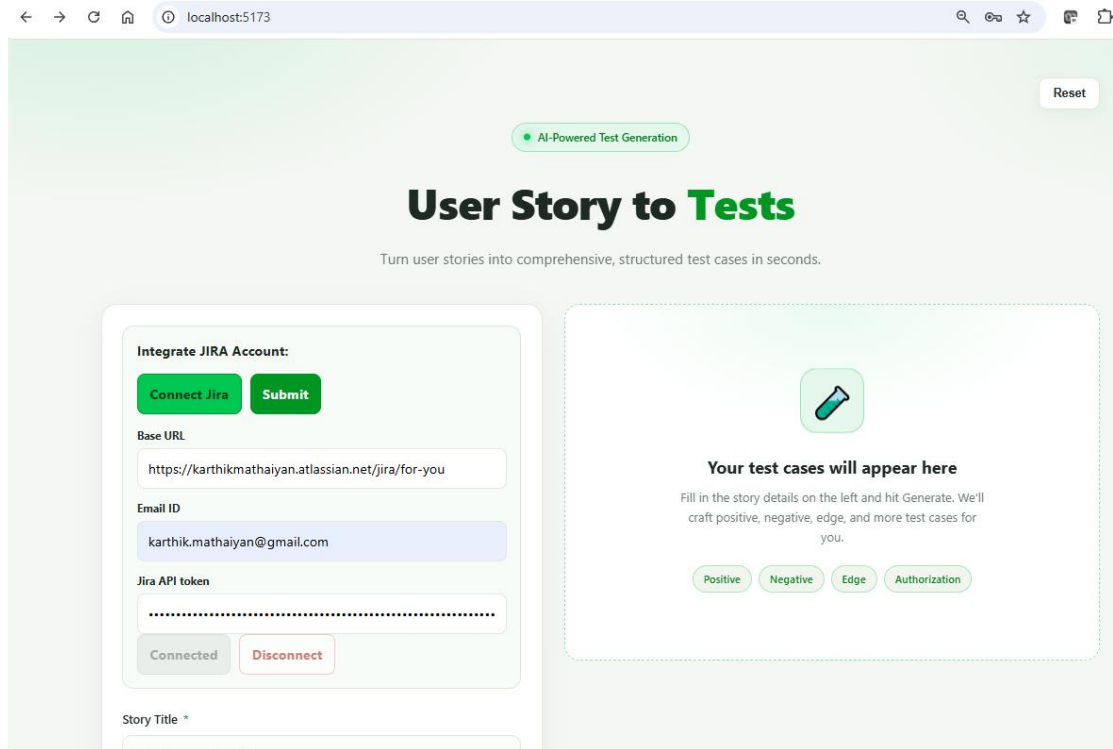

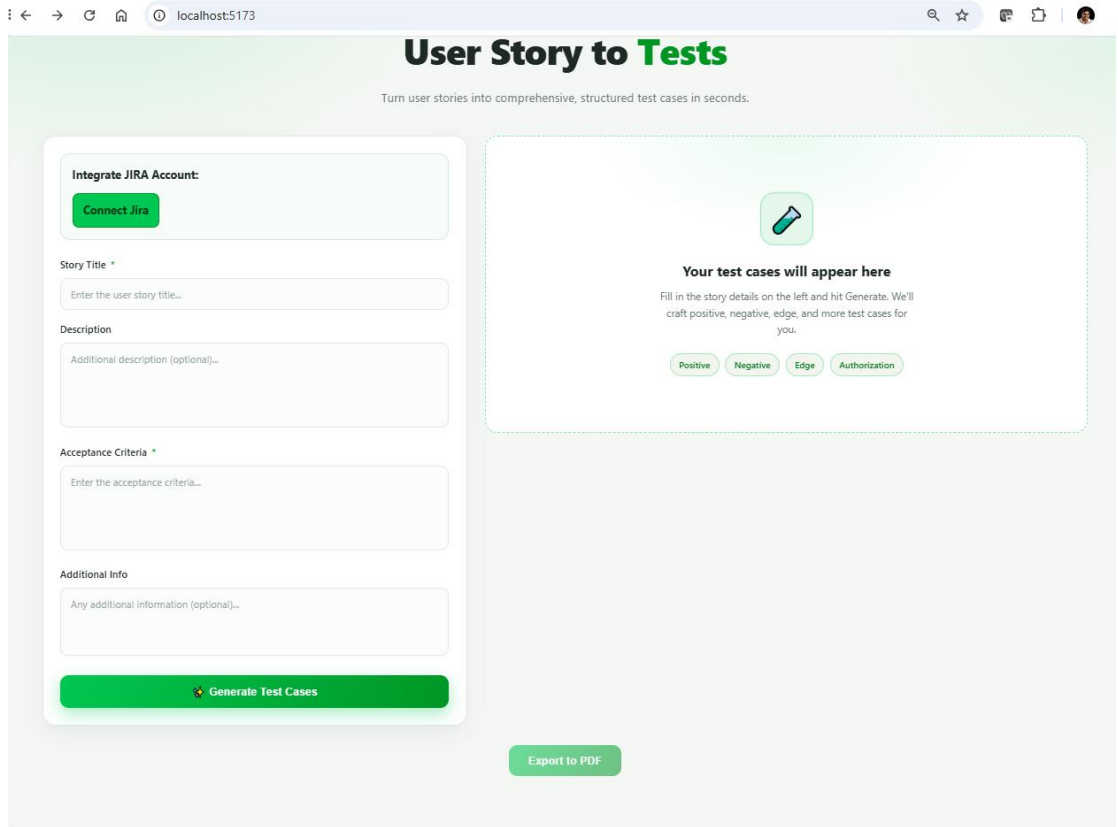

- Added a Reset button at the top right side of the page.
- Added a Download PDF button at the center bottom of the page
- 'Export to PDF' button will be grayed when no TC displayed in the page.
- Integrate JIRA:
  - Add a new section neatly just above the existing Input form (just above 'Story Title') in the Front end UI - with section name as 'Integrate JIRA Account:'
  - Add "Connect Jira" button as first item in the above section to establish the connection.
  - When user clicks on 'Connect Jira' button, UI should ask user to enter the below details, to establish connection.
    - \* 'Base URL' field with text box
    - \* 'Email ID' field with text box
    - \* 'Jira API token' field with text box.
  - Submit button should be displayed just beside the "Connect Jira" button
  - After enter all details, when user click on Submit button, put two hearts symbol and represent its connecting each other with ECG lines symbol as loading symbol.
  - Just at the bottom of the Integrate JIRA section / panel (below JIRA API token field) - Connected & Disconnect buttons should be displayed beside each other.

- Once Jira connection is established, Connected button should be displayed and grayed.
- Disconnect button should be enabled.
- Connected the app to Jira through the backend proxy to avoid browser CORS issues
- Once the jira is connected, user stories should be populated in the UI screen.
- Fetched Jira stories from the backend and displayed them

Entered the above in VSCode chat as below:

Before Entering Any Details: UI looks as below,

After Entering all JIRA details, Connected and TC pulled the details:

The screenshot displays a web application titled "User Story to Tests" running on localhost:5173. The interface is divided into two main sections: "Integrate JIRA Account" and "Generated Test Cases".

**Integrate JIRA Account:**

- Connect Jira:** A green button to initiate the connection.
- Base URL:** A text input field containing "https://karthikmathaiyan.atlassian.net/".
- Email ID:** A text input field containing "karthikmathaiyan@gmail.com".
- Jira API token:** A text input field with a masked token "\*\*\*\*\*".
- Connected/Disconnect:** Two buttons at the bottom of the integration form.
- Story Title:** A text input field containing "Test Case for Money transfer from Bank to bank through Mobile app".
- Description:** A text area containing the description: "Money transfer from SBI Bank to ICICI bank through Mobile app using YONO app. Max amount transfer per day is 10000 without adding Beneficiary account, just by using recipient mobile number, user will be allowed to transfer max10 times per day."
- Acceptance Criteria:** A text area containing the criteria: "Both users should have SBI Bank to ICICI bank account and activate online banking."

**Generated Test Cases:**

Summary: 13 test case(s), Model: openai/gpt-oss-120b, Tokens: 2642

| TEST CASE ID | TITLE                                                           | CATEGORY | EXPECTED RESULT                                                                                                   |
|--------------|-----------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------|
| TC-001       | Successful transfer within daily limit on first attempt         | Positive | Transfer is processed successfully and confirmation message is displayed; transaction appears in transfer history |
| TC-002       | Transfer maximum allowed amount (10000) in a single transaction | Positive | Transfer succeeds, showing success message and updated balance reflecting deduction of 10000                      |
| TC-003       | Perform ten consecutive transfers within daily limit            | Positive | All ten transfers are processed successfully; total transferred amount equals 5000 and daily transfer count is 10 |
| TC-004       | Attempt transfer exceeding daily amount limit                   | Negative | Transfer is blocked with error message: 'Daily transfer limit of 10000 exceeded'                                  |
| TC-005       | Attempt eleventh transfer in a single day                       | Negative | Transfer is rejected with error message: 'Maximum of 10 transfers per day reached'                                |
| TC-006       | Transfer using invalid recipient mobile number                  | Negative | App displays validation error: 'Please enter a valid 10-digit mobile number'                                      |

The bottom of the image shows a Windows taskbar with various application icons and a system clock indicating 02:14 on 21-08-2026.
